Progress Summary

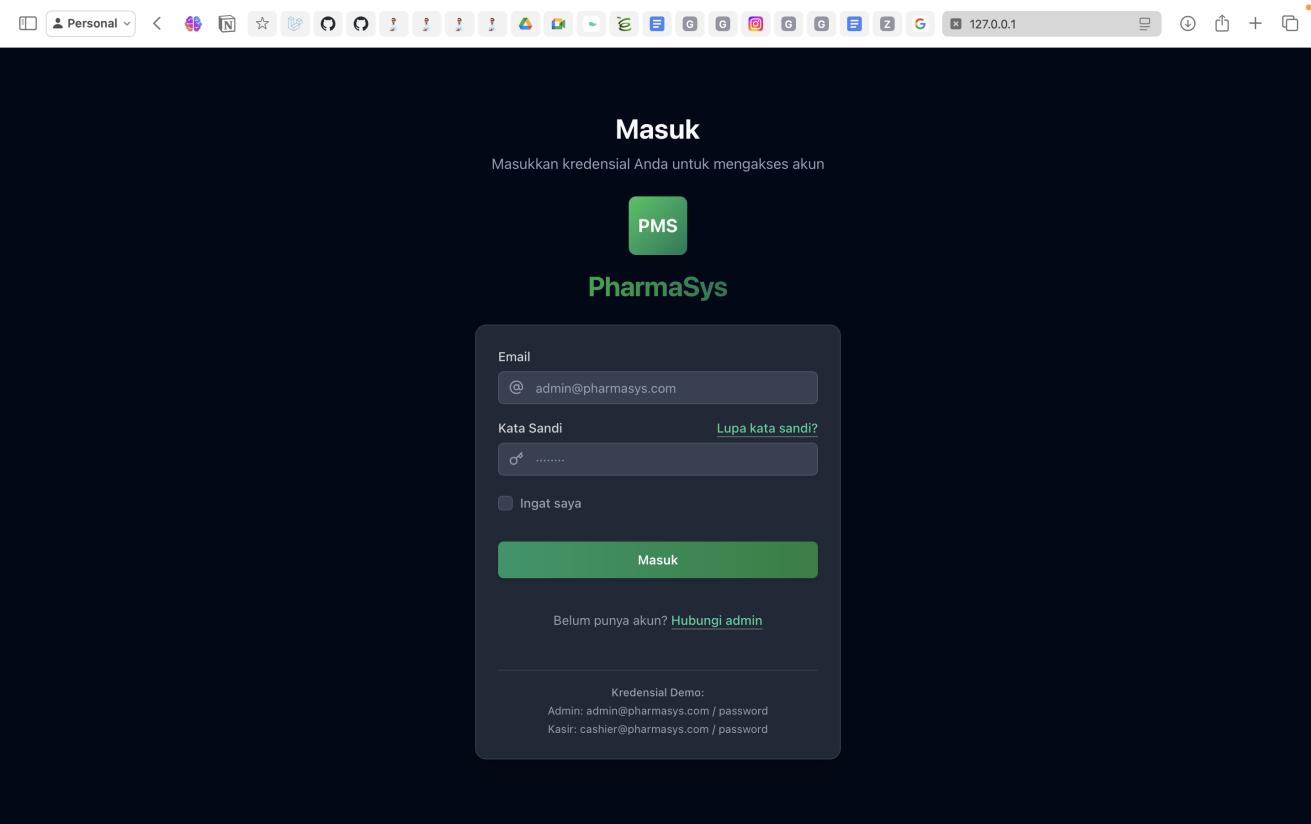

Accomplished Tasks

Memperbarui Tampilan

Pada minggu ini, kami melakukan upaya perbaikan dan penyempurnaan tampilan antarmuka sistem agar terlihat lebih modern dan responsif. Salah satu langkah signifikan yang kami ambil adalah mengganti teknologi pengelolaan asset front-end yang sebelumnya menggunakan Laravel Mix menjadi Laravel Vite. Perubahan ini didasari oleh kebutuhan untuk meningkatkan efisiensi dalam proses pengembangan, mempercepat waktu build, serta memanfaatkan dukungan teknologi modern seperti React, Tailwind CSS, dan TypeScript secara lebih optimal. Laravel Vite menyediakan fitur hot module replacement (HMR) yang memungkinkan perubahan kode terlihat secara langsung tanpa perlu me-refresh halaman, sehingga sangat mempercepat proses iterasi desain dan pengujian antarmuka. Dengan beralih ke Laravel Vite, kami berharap pengalaman pengguna dan performa sistem dapat ditingkatkan secara signifikan, sejalan dengan tujuan kami untuk menghadirkan sistem yang modern, cepat, dan mudah dikembangkan ke depannya.
